Re: United States of America vs. Michael Ray Pruneau  
Petition to Dismiss Probationary Period

I, Michael Ray Pruneau, hereby petition the United States District Court, Eastern District of Missouri in reference to the United States of America vs. Michael Ray Pruneau (4:00CR00539 CEB) to reconsider and dismiss my 12-month probationary period, currently projected to begin April 15, 2021, in light of extraordinary hardship endured through an extended, cell-confined lockdown at USP Marion in response to the COVID-19 epidemic. From April 1, 2020 until at least August 1, 2020 (at which time the policy will be reconsidered and likely extended again due to continued spread) I have been subjected to excessive and unusual confinement consisting of 23 hours per day in a 3-man cell, which also prevented participation in UNICOR employment. As a result of this unusual confinement and the inability to work and contribute to post-release savings, I respectfully petition the Court to dismiss my pending 12-month supervised probationary period and granting time served. While the extended lockdown was deemed non-punitive by the Bureau of Prisons, the effect indeed is punitive, creating atypical stress, hardship, and suffering for which I'm seeking dismissal through this petition. Dismissal of a probationary period also allows me to live in residence with and care for my 83-year-old father, as well as provides employment opportunities with previously known and established companies. Furthermore, in light of likely continued risk of exposure to the virus through halfway house placement, the aforementioned residential placement reduces or eliminates such risk. Thank you in advance for your time and attention to this matter.

Sincerely,

Michael Ray Pruneau

*Michael R. Pruneau*
